

## **Important Information Concerning Natural Gas Piping**

### **For the Homebuilder:**

If you are building a new home that includes a natural gas whole house generator and or several natural gas appliances, please be sure to check with your plumber to see if an elevated pressure meter may be required and if elevated pressure is available in your area prior to the completion of the home. If you need assistance, please contact ESP Marketing at 850-436-5050.

### **For the Homeowner:**

If you are having a whole house generator installed and or several natural gas appliances, please be sure to check with your plumber to see if an elevated pressure meter may be required and if elevated pressure is available in your area. If you need assistance, please contact ESP Marketing at 850-436-5050.

### **For the Plumber:**

If you are planning to install natural gas piping in a new or existing home for a whole house generator and or several natural gas appliances, please verify prior to installation if an elevated pressure meter is needed ([Elevated Pressure Request Form required](#)) **and if elevated pressure is available in the area.**
